As a medior (UX/UI) Designer & Researcher, I bring extensive experience in tackling complex, ambiguous problems and translating them into intuitive, scalable, and user-centered solutions. I combine strategic thinking with hands-on design execution, balancing creativity with data-driven decision-making to deliver meaningful product outcomes. With a collaborative mindset, I work closely with cross-functional teams to align user needs with business goals, while mentoring others and contributing to design maturity within organizations. Curious by nature and open-minded in approach, I am committed to continuous learning and staying at the forefront of evolving design practices and emerging technologies.
